

PROJECT TITLE

Project Members Name Surname

Advisor Name Surname

Contents

1. Company Information
2. Problem
3. Analysis
4. Solution
5. Results and Conclusion
6. References
7. Demo

Company Information

- Give a brief information about company, such as history, what they do, organization, ...
- If an external company is not involved, provide target **market info** (potential users / companies / institutions who would buy your product)

Problem

- In this slide, you should explain the problem you are trying to solve

Analysis

- Literature search about the problem and possible solutions.
- How your solution differs from existing solutions.

Solution

- Describe your solution (block diagram, flow chart, etc.)
- Also talk about used technology while was developing your project.(Asp.Net , Java EE , MsSql, Oracle, PHP)

Results and Conclusions

- In this section, present the results you have achieved and conclusions you have reached.
- List the *advantages* and *disadvantages* of your work.
- You may also have a separate section for future work.

References

- Especially research-oriented projects, should include at least a few references to the literature. You can choose any style but be consistent and complete in your reference list.

Demo

- In this section, you should show your project screen and describe the target of the screen.
